## Cuore ERC 3000

<b>Composition</b>	<b>Cuore ERC 3000</b> is a 2-component, solvent free, epoxy.
<b>Application</b>	<b>Cuore ERC 3000</b> is applied as a rollercoat for different substrates as cementitious screed and concrete. Application areas are for example: garages, warehouses, distribution centres en production areas.
<b>Technical properties</b>	Density Resin + Hardener                      1740 kg/m <sup>3</sup> Shore hardness D (DIN 53505)                ~ 80 D Wear resistance (Taber)                        0,097 gram ASTM D 4060 CS 17 1000/1kg
<b>Pre-treatment substrate</b>	To ensure a permanent bonding of a synthetic finish, a correct pre-treatment of the substrate is necessary. In general it is assumed that all substrates to be finished must be free of grease, oil, dirt, moisture and other contaminations that may influence the adhesion with the substrate in a negative way. This applies to both existing and new substrates. New cement based substrates must be at least, 4 to 6 weeks old, and must have a moisture content of no more than 3%, measured according to the calcium carbid method, before <b>Cuore ERC 3000</b> can be applied.  A manual about substrate pre-treatment is available on request.
<b>Consumption</b>	The consumption of the <b>Cuore ERC 3000</b> depends on the roughness and porosity of the substrate. On average, the consumption is approx. 300-500 grams/m <sup>2</sup> per layer.
<b>Mixing ratio</b>	84    Parts by weight Resin 605400 16    Parts by weight Hardener 805400
<b>Temperature substrate</b>	min. 10 °C and max. 30 °C. The temperature of the substrate must be at least 3 °C above the dew point.
<b>Relative humidity</b>	min. 30 % and max. 80 %
<b>Application temperature</b>	min. 10 °C and max. 30 °C
<b>Application temperature material</b>	min. 15 °C and max. 25 °C
<b>Mixing ratio</b>	1) Open the container with the resin and mix the material till it is homogenous. 2) Open the container with the hardener and add the hardener to the resin.

Onze adviezen met betrekking tot de technische toepassing in woord, geschrift of door middel van proeven, worden naar beste weten verstrekt, doch gelden slechts als vrijblijvende aanwijzingen, ook ten aanzien van eventueel beschermende rechten van derden. Zij ontslaan u niet van de verplichting, de door ons geleverde producten op hun geschiktheid voor de beoogde procedures en doeleinden te controleren. Toepassing, gebruik en verwerking van de producten vinden plaats buiten onze controlemogelijkheden. Zij vallen derhalve onder uw eigen verantwoordelijkheid. In geval van eigen aansprakelijkheid blijft deze, voor alle schadegevallen, beperkt tot de waarde van de door ons geleverde en door u gebruikte goederen. Vanzelfsprekend garanderen wij u de goede kwaliteit van onze producten, e.e.a. volgens de in onze algemene verkoop- en leveringsvoorwaarden genoemde maatstaven.

- 3) Mix both components mechanically about 2 minutes till a homogenous mixture is formed.  
A well mixed material is uniform in color without containing clear or dark spots.
- 4) To avoid mixing errors or unmixed residue; pour the mixed material into a clean and empty container and mix again for a short time. Never use unmixed residue of the material.

#### Application time

The application time of the **Cuore ERC 3000** at 20 °C is about 25 to 30 minutes.

**Note:** At a temperature rise of 10 °C the application time will reduce by half.

At a temperature reduction of 10 °C the application time will double.

#### Drying and curing

The drying and curing times of the **Cuore ERC 3000**, at a consumption of 500 gram/m<sup>2</sup> is as follows:

- re-coatable : after 16 hours and a maximum within 48 hours at 20°C.
- fully cured : after 7 days at 20 °C

#### Colour - structure - gloss

On request from RAL/NCS - smooth – glossy

#### Packaging

10 kg and 20 kg set packaging

#### Chemical resistance

Resistant against the most common chemicals. A chemical resistance list is available on request.

#### Precautions

It is important that applicable requirements for working with synthetics are adhered to.

It is therefore advised to avoid skin and eye contact, by using creams and/or liquid-proof gloves, safety glasses, etc. When processing **Cuore ERC 3000**, especially in small, enclosed spaces, it is recommended to ventilate very well.

#### Tools

**Cuore ERC 3000** can be applied with:

- roller
- straight trowel
- squeegee

#### Tool cleaning

Used tools can be cleaned with Cuore Tool Cleaner.

#### Shelf life

In the original, unopened packaging, stored in a dry place between 5 °C en 25 °C, **Cuore ERC 3000** has a shelf life of 12 months minimum.

**Note:** **Cuore ERC 3000** may not be stored or exposed to temperatures beneath 5 °C.

**Note:** in time, a form of separation may occur. It is necessary to mix up the material to a 100% smooth, homogenous mass before the B component is added. When in doubt about the homogeneity and / or fineness, we advise to first pass the material through a sieve

before further use. If the material can no longer be mixed up to a homogeneous, smooth mass, you can contact **Cuore** for advice.

#### Attention

**Cuore ERC 3000** may only be applied by trained and professional installers.
